

## OfficeKey

### Your user friendly TAS interface

Introducing a comprehensive real time user friendly interface to the Diamond Key International Omega 3000 and SimTas Terminal Automation Systems.

OfficeKey is multilingual and can be installed in any of twelve languages.

DKI TAS utilises client/server architecture where OfficeKey is the client. It can be run on any Windows 98/2000/XP operating system, thus eliminating the need for specialised consoles. OfficeKey can function in the operators language of choice allowing standardisation across country borders. Each screen provides a friendly graphical user interface with dropdown lists, menus, buttons and check boxes incorporating 'point and click' workflow.

OfficeKey provides access to DKI TAS server functionality including:

#### Stock management

Monitor stock levels and batch intake at a site such as meter totals and site balances.

#### Load scheduling

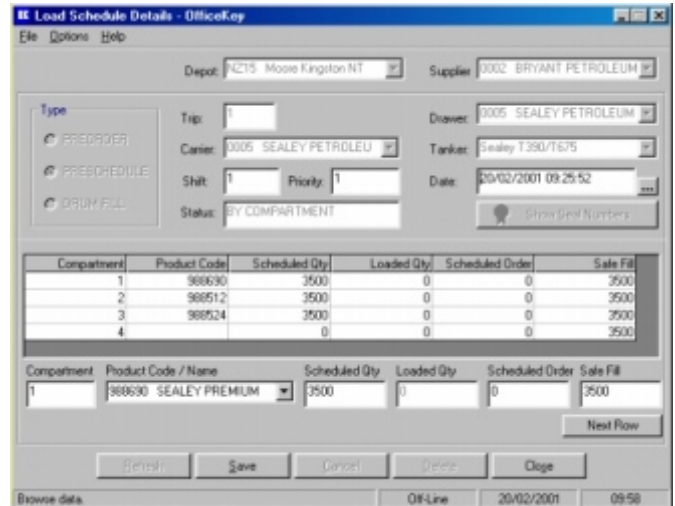

Set up pre-scheduled, pre-ordered or drumfill loads and related components such as seal numbers, equipment and tanker lists.

#### Security

Maintain access control using time codes, cards and associated personnel details.

#### Gantry supervisor

Comprises various functionality such as configuration of loading bays, products, storage tanks and vehicles.

Compartment	Product Code	Scheduled Qty	Loaded Qty	Scheduled Order	Sale Fill
1	988630	3500	0	0	3500
2	988512	3500	0	0	3500
3	988524	3500	0	0	3500
4		0	0	0	3500

Password security is provided for all access to OfficeKey and data is kept secure by ensuring that it is only available for the company to which the user belongs.

OfficeKey comes provided with a powerful and flexible reporting function - a number of pre-configured 'Reports' with the ability of exporting report data to software applications.

Reports include:

- Site balance
- Liftings
- Product movements
- Meterings
- Product totals

In addition, data from OfficeKey can be transferred to other Windows applications such as MS Excel and MS Access to allow for the development of customised reports.
